## INTRODUCTION

This Management's Discussion and Analysis ("MD&A") of Uranium Participation Corporation and its subsidiary (collectively, "UPC" or the "Corporation") provides a detailed analysis of the Corporation's business and compares its financial results with those of the previous year. This MD&A is dated as of June 29, 2015 and should be read in conjunction with the Corporation's unaudited interim consolidated financial statements and related notes for the three months ended May 31, 2015. The unaudited interim consolidated financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). Readers are also encouraged to consult the audited consolidated financial statements and the MD&A for the year ended February 28, 2015. All dollar amounts are expressed in Canadian dollars, unless otherwise noted. All uranium prices are based on prices published by Ux Consulting Company LLC ("UxCo").

## CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

Certain information contained or incorporated by reference in this MD&A constitutes forward looking statements or forward looking information. These statements can be identified by the use of forward looking terminology such as "may", "will", "expect", "intend", "estimate", "anticipate", "plan", "should", "believe" or "continue" or the negative thereof or variations thereon or similar terminology.

By their very nature, forward looking statements involve numerous factors, assumptions and estimates. A variety of factors, many of which are beyond the control of UPC, may cause actual results to differ materially from the expectations expressed in the forward looking statements. For a list of the principal risks of an investment in UPC, please refer to the "RISK FACTORS" section of UPC's Annual Information Form dated May 11, 2015, available on SEDAR at [www.sedar.com](http://www.sedar.com).

These and other factors should be considered carefully, and readers are cautioned not to place undue reliance on these forward looking statements. Although management reviews the reasonableness of its assumptions and estimates, unusual and unanticipated events may occur which render them inaccurate. Under such circumstances, future performance may differ materially from those expressed or implied by the forward looking statements. Except where required under applicable securities legislation, UPC does not undertake to update any forward looking information.

## OVERVIEW

UPC invests substantially all of its assets in uranium, either in the form of uranium oxide in concentrates ("U<sub>3</sub>O<sub>8</sub>"), or uranium hexafluoride ("UF<sub>6</sub>") (collectively "uranium"), with the primary investment objective of achieving appreciation in the value of its uranium holdings through increases in the uranium price. Denison Mines Inc. (the "Manager"), under the direction of the Corporation's Board of Directors, provides general administration and management services to the Corporation. The common shares of the Corporation are listed and trade on the Toronto Stock Exchange under the symbol "U".

Uranium spot prices began the reporting quarter at US\$38.75 per pound U<sub>3</sub>O<sub>8</sub> and traded between US\$39.00 and US\$39.50 through mid-April on above average volumes which were in part attributable to producer buying. As demand retreated during the quarter, spot prices fell sharply reaching a low of US\$35.00 per pound U<sub>3</sub>O<sub>8</sub> by late May and then closing out the reporting quarter at that level. Subsequent to quarter-end, demand has re-emerged, particularly in the form of utility spot, medium and long-term interest. As a result, prices as quoted on June 22, 2015 had recovered to a level of US\$36.50 per pound U<sub>3</sub>O<sub>8</sub>. Longer-term fundamentals appear positive based on emerging market nuclear growth and declining primary and secondary supplies available to the spot market. Reactor re-start progress continues slowly in Japan, with five units now cleared for restart by the federal regulator. On the supply side, continued price weakness has contributed to the decision by one major producer to shelve new mine development at what has been one of the industry's largest and longest running operations in Australia.

Management's Discussion and Analysis

Three Months Ended May 31, 2015

(Expressed in Canadian Dollars, unless otherwise noted)

The Corporation had an effective tax rate of nil for the three months ended May 31, 2015, primarily due to substantively enacted current and future tax rates, in UPC's various jurisdictions, ranging from 2.96% to 26.5% and the timing of the recognition of deferred tax assets.

## Investment Portfolio

UPC's investment portfolio consists of the following as at May 31, 2015:

(in thousands, except quantity amounts)	Quantity	Cost	Fair Value
<b>Investments in Uranium:</b>			
U <sub>3</sub> O <sub>8</sub>	9,570,024 lbs	\$ 458,202	\$ 417,516
UF <sub>6</sub>	1,903,471 KgU	\$ 311,862	\$ 229,722 <sup>(1)</sup>
		\$ 770,064	\$ 647,238

U<sub>3</sub>O<sub>8</sub> average cost and market value per pound:

In Canadian dollars	\$ 47.88	\$ 43.63 <sup>(2)</sup>
In United States dollars	\$ 43.84	\$ 35.00

UF<sub>6</sub> average cost and market value<sup>(1)</sup> per KgU:

In Canadian dollars	\$ 163.84	\$ 120.69 <sup>(2)</sup>
In United States dollars	\$ 151.62	\$ 96.82

(1) Includes a \$3,987,000 fair value decrease adjustment for UF<sub>6</sub> inventory held with the United States Enrichment Facility ("USEC Facility").

(2) Translation to Canadian dollars calculated at period-end foreign exchange noon-rate.

## Sale of Conversion Components

In May 2015, the Corporation completed the sale of the conversion component contained in 100,000 KgU as UF<sub>6</sub> in return for 261,285 pounds of U<sub>3</sub>O<sub>8</sub> and cash consideration of \$891,000 (US\$715,000). The loss on the sale of the conversion components in May 2015 was \$140,000.

The Corporation has sold the conversion component in UF<sub>6</sub> in order to convert some of its UF<sub>6</sub> holdings to U<sub>3</sub>O<sub>8</sub>.

## Uranium Lending Arrangement

In March 2015, the Corporation entered into an agreement to loan 1,300,000 pounds of U<sub>3</sub>O<sub>8</sub> with a return date in April 2017. The loan is subject to a loan fee of 1.0% per annum, with payments calculated quarterly based on the average of the U<sub>3</sub>O<sub>8</sub> spot price per pound, as defined and published by UxCo at the end of each month for the previous three months. Collateral, in the form of an irrevocable bank guarantee, for the loan is provided in the amount of US\$56,000,000, which can be adjusted based on movements in the uranium price.

At May 31, 2015, the market value of the 1,300,000 pounds of U<sub>3</sub>O<sub>8</sub> loaned was \$56,716,000 (US\$45,500,000).

## Fair Value Adjustment on UF<sub>6</sub>

In May 2013, the USEC Facility announced that it ceased uranium enrichment at its Paducah Gaseous Diffusion Plant in Kentucky. At May 31, 2015, the Corporation has 1,064,000 KgU as UF<sub>6</sub> stored with the USEC Facility with a fair value of \$130,638,000. In addition, the Corporation has recorded a fair value decrease adjustment of \$3,987,000 to reflect the risk associated with its UF<sub>6</sub> stored with the USEC Facility. The Corporation plans to relocate this material to another facility through location swaps over the next 18 months and currently expects the cost of this process to be offset by the above noted fair value adjustment.

## LIQUIDITY AND CAPITAL RESOURCES

Cash and cash equivalents were \$14,103,000 at May 31, 2015 compared with \$17,753,000 at February 28, 2015. The decrease of \$3,650,000 was primarily due to the Corporation's purchase of 356,500 of its outstanding shares during March 2015, pursuant to a normal course issuer bid ("2014 NCIB") filed with the Toronto Stock Exchange in November 2014. Shares were purchased pursuant to the 2014 NCIB at an average cost of \$5.60 per share for a total cost of \$1,999,000, including transaction costs. The cash consideration of US\$715,000 for the sale of the conversion component during May 2015 as discussed above is included in trade and other receivables at the end of the quarter and was subsequently received and included in cash and cash equivalents after period end.

The Corporation's capital structure consists of share capital and contributed surplus. Uranium purchases are normally funded through common share offerings with at least 85% of the gross proceeds of share offerings invested in, or set aside for future purchases of uranium. At May 31, 2015, the Corporation has invested more than the required minimum amount of 85% of its aggregate gross proceeds of share offerings in uranium. In strictly limited circumstances, the Corporation can enter into short-term borrowing arrangements for up to 15% of its net asset value to facilitate the purchases of uranium. To date, the Corporation has not entered into any short-term borrowing arrangements.

On October 31, 2014, the Corporation filed the Short Form Base Shelf Prospectus ("Prospectus") with the securities regulatory authorities in each of the provinces of Canada, other than Québec. The Corporation may issue common shares or warrants or any combination of such securities as units ("Securities"), in amounts, at prices, and on terms to be determined based on market conditions at the time of sale and as set forth in the Prospectus, for an aggregate offering amount of up to \$200,000,000 during the 25 month period that the Prospectus remains effective until November 30, 2016. As at May 31, 2015, the Corporation has not issued any Securities pursuant to the Prospectus.

Pursuant to the 2014 NCIB, the Corporation is authorized to purchase up to 7,500,000 of the Corporation's common shares during the 12 month period commencing November 24, 2014 and ending November 23, 2015, or on such earlier date as the Corporation completes its purchases. As at May 31, 2015, the Corporation purchased 356,500 of its outstanding shares under the 2014 NCIB during March 2015.

## RELATED PARTY TRANSACTIONS

### Management Services Agreement with Denison Mines Inc.

## OUTSTANDING SHARE DATA

At June 29, 2015, there were 116,516,413 common shares issued and outstanding.

## CONTROLS AND PROCEDURES

The Corporation's management is responsible for establishing and maintaining an adequate system of internal control over financial reporting. Any system of internal control over financial reporting, no matter how well designed, has inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to the financial statement preparation and presentation.

There has not been any change in the Corporation's internal control over financial reporting that occurred during the three months ended May 31, 2015 that has materially affected, or is reasonably likely to materially affect, the Corporation's internal control over financial reporting.

## NON-IFRS FINANCIAL PERFORMANCE MEASURES

This MD&A contains references to NAV and "diluted NAV", which are non-IFRS financial performance measures. The NAV is calculated as the value of total assets less the value of total liabilities, divided by the total number of common shares outstanding as at a specific date. Diluted NAV is calculated by adjusting the weighted average number of common shares outstanding for dilutive instruments. The number of shares included is computed using the treasury stock method. The term NAV or diluted NAV does not have any standardized meaning according to IFRS and therefore may not be comparable to similar measures presented by other companies. There is no comparable IFRS financial measure presented in UPC's consolidated financial statements and thus no applicable quantitative reconciliation for such non-IFRS financial performance measure. The Corporation has calculated NAV and diluted NAV consistently for many years and believes these measures provide information useful to its shareholders in understanding UPC's performance and may assist in the evaluation of the Corporation's business relative to that of its peers.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
THREE MONTHS ENDED MAY 31, 2015 AND 2014

(Unaudited - Expressed in Canadian dollars, unless otherwise noted)

## 1. URANIUM PARTICIPATION CORPORATION

Uranium Participation Corporation ("UPC") was established under the Business Corporations Act (Ontario) on March 15, 2005. The address of its registered head office is 595 Bay Street, Suite 402, Toronto, Ontario, Canada, M5G 2C2.

UPC, including its subsidiary (collectively, the "Corporation"), invests substantially all of its assets in uranium oxide in concentrates ("U<sub>3</sub>O<sub>8</sub>") and uranium hexafluoride ("UF<sub>6</sub>") (collectively "uranium") with the primary investment objective of achieving appreciation in the value of its uranium holdings through increases in the uranium price. Denison Mines Inc. (the "Manager"), under the direction of the Corporation's Board of Directors, provides general administration and management services to the Corporation. The common shares of UPC are listed and trade on the Toronto Stock Exchange under the symbol "U".

## 2. BASIS OF PRESENTATION

These interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including International Accounting Standard ("IAS") 34, *Interim Financial Reporting*. These interim consolidated financial statements should be read in conjunction with the audited annual consolidated financial statements for the year ended February 28, 2015.

All uranium prices are based on prices published by Ux Consulting Company LLC ("UxCo").

All dollar amounts are expressed in Canadian dollars, unless otherwise noted.

These financial statements were authorized for issue by the Corporation's Board of Directors on June 29, 2015.

## 3. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies used in preparing these interim consolidated financial statements are consistent with those applied in the Corporation's audited annual consolidated financial statements for the year ended February 28, 2015.

### Accounting Standards Issued But Not Yet Adopted

The Corporation has not yet adopted the following accounting pronouncement effective for the Corporation's fiscal periods beginning on or after March 1, 2016:

#### IFRS 9 – Financial Instruments

In July 2014, the IASB published the final version of IFRS 9 *Financial Instruments* ("IFRS 9"), which brings together the classification, measurement, impairment and hedge accounting phases of the IASB's project to replace IAS 39 *Financial Instruments: Recognition and Measurement*. IFRS 9 replaces the multiple classifications for financial assets in IAS 39 with a single principle based approach for determining the classification of financial assets based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. The final version of IFRS 9 is effective for periods beginning on or after January 1, 2018; however, it is available for early adoption.

The Corporation has not yet assessed the impact nor determined whether it will early adopt this standard.

#### 4. INVESTMENTS IN URANIUM

The investments continuity summary is as follows:
